General Protective and Hygienic Measures:

Adhere to good laboratory practices (GLP).

Wash hands during breaks and at the end of the work.

Breathing Equipment:

Not necessary, if room is well-ventilated.

Take precautions, if chemical concentrations exceed the exposure limits (if any) listed above.

Protection of Hands:

The gloves serve to protect the user against splashes. For safety reasons they should be changed immediately after wetting.

Since the product is in fact a preparation out of several substances, no specific information can be given on the permeation breakthrough time. The choice of suitable gloves depends not only on the material, but also on other quality features and must, therefore, be checked with the respective manufacturer. As far as we know, disposable gloves, among other things out of nitriles, are suitable. Nevertheless, this recommendation is not intended to replace a suitability test, which is essential and must be carried out under the respective conditions of use.

Eye Protection: Safety glasses recommended during refilling.
