FOR IMMEDIATE RELEASE

October 5, 2022 - Savvik Buying Group announces partnership with American Nitrile

St. Cloud, Minnesota – Savvik Buying Group is proud to announce a national distributor partnership with American Nitrile for domestically made nitrile gloves. A focus of Savvik in 2022 is to find domestic sources of supply to avoid disruptions going forward with the supply chain. “As Savvik celebrates our 25th year serving our members, we are excited to partner with American Nitrile. Having domestic production with a top-of-the-line glove will position Savvik members to avoid supply chain disruptions on a vital product.” said Executive Director Mickey Schulte.

American Nitrile will be manufacturing at its new 530,000 sq ft. manufacturing plant in Grove City, Ohio beginning this fall. American Nitrile’s production facility will leverage best-in-class manufacturing processes and automation to reduce the impact of higher labor costs and displace volume sourced from Asia, while creating hundreds of new jobs for workers in Ohio. The facility includes a state-of-the-art water treatment and reclamation system that recycles 50% of the wastewater generated by the manufacturing process. This, coupled with the elimination of emissions from transpacific shipping, results in a substantially reduced carbon footprint for nitrile gloves manufactured by American Nitrile when compared to their Asian competitors. “We believe that American manufacturing deserves a comeback,” said Jacob Block, founder, and CEO of American Nitrile.

Please visit Savvik and American Nitrile at EMS World, booth 1002.
